

# Quick Setup Guide

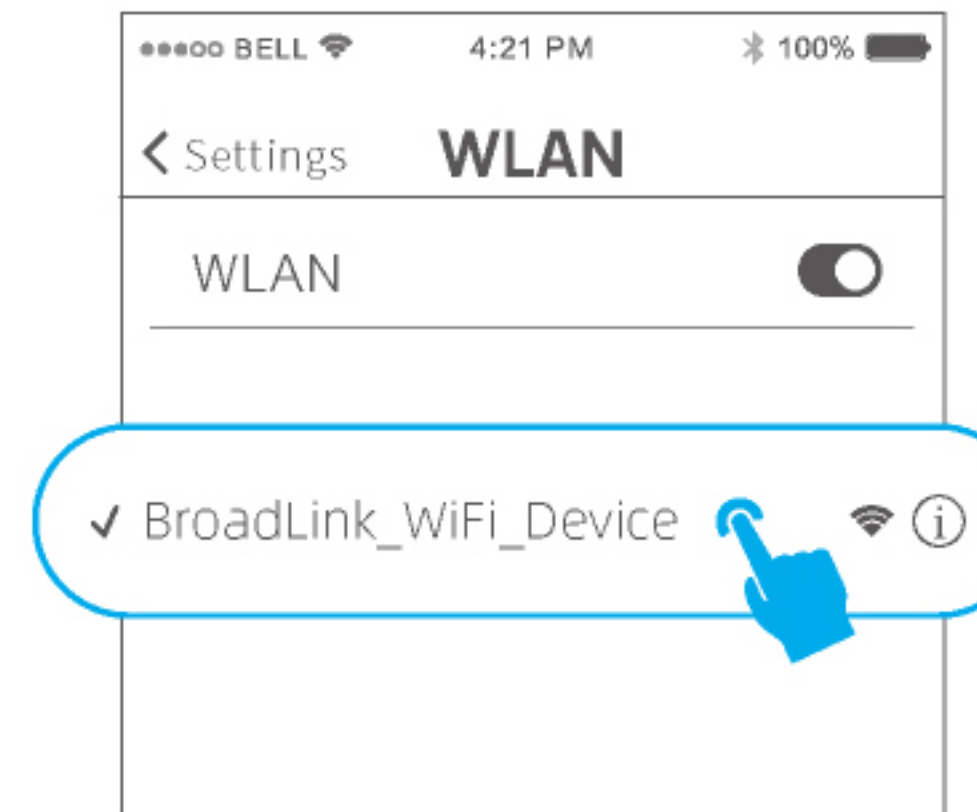

## STEP 1 What's required

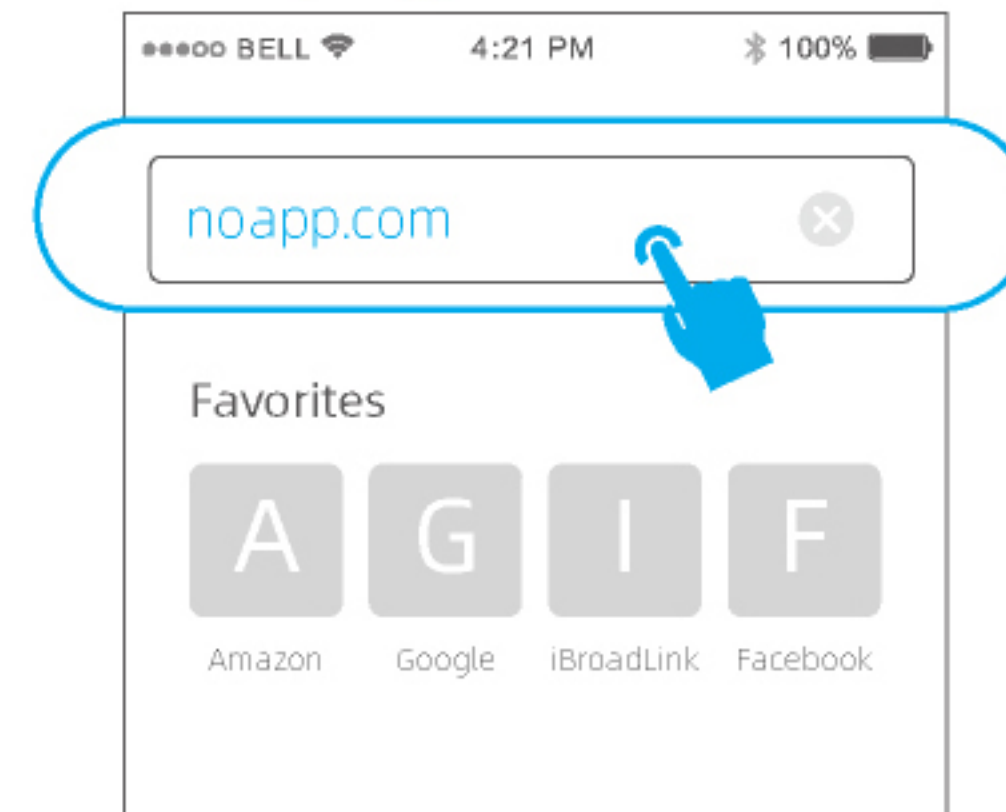

- A smartphone or tablet running iOS 9.0 / Android™ 4.1 or higher.
- A 2.4GHz Wi-Fi network with Internet connection.
- Power on the device and make sure the LED indicator or bulb is flashing intermittently.

## STEP 2 Find your settings

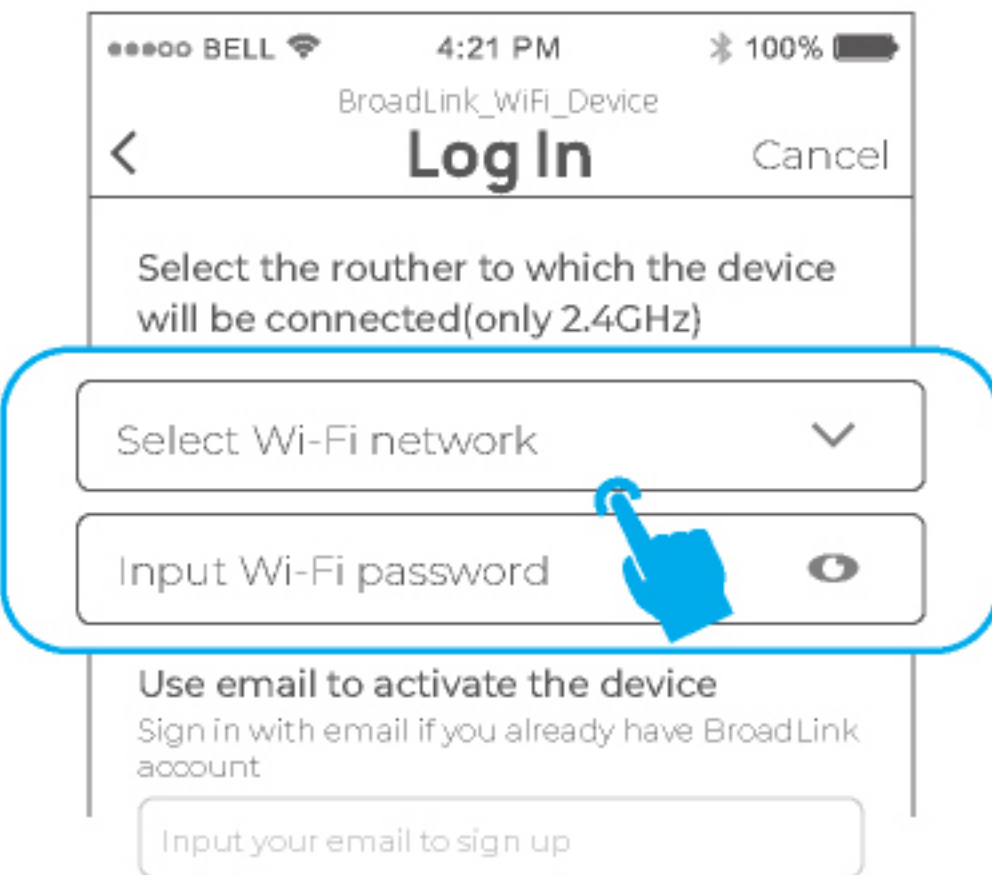

- Open up your phone's settings and select WLAN.
- In your smartphone's Wi-Fi settings, connect to "BroadLink\_WiFi\_Device" wireless network.
- If you can not find the device Wi-Fi network, please disable and enable WLAN to try again.

## STEP 3 Access landing page

- \* A landing page will pop up on your smartphone.
- \* In case the landing page does not show up, open browser on phone and enter [noapp.com](http://noapp.com) to access the landing page.
- \* You can also connect a laptop to "BroadLink\_WiFi\_Device" and visit [noapp.com](http://noapp.com) on browser to access landing page.

## STEP 4 Input information

- Select your home Wi-Fi name and input its password.
- Input your **email\*** as an account name. Then proceed and tap "Connect now" in next page to complete network setup.
- \* The email will be used in STEP 7.

## STEP 5 Connect to cloud

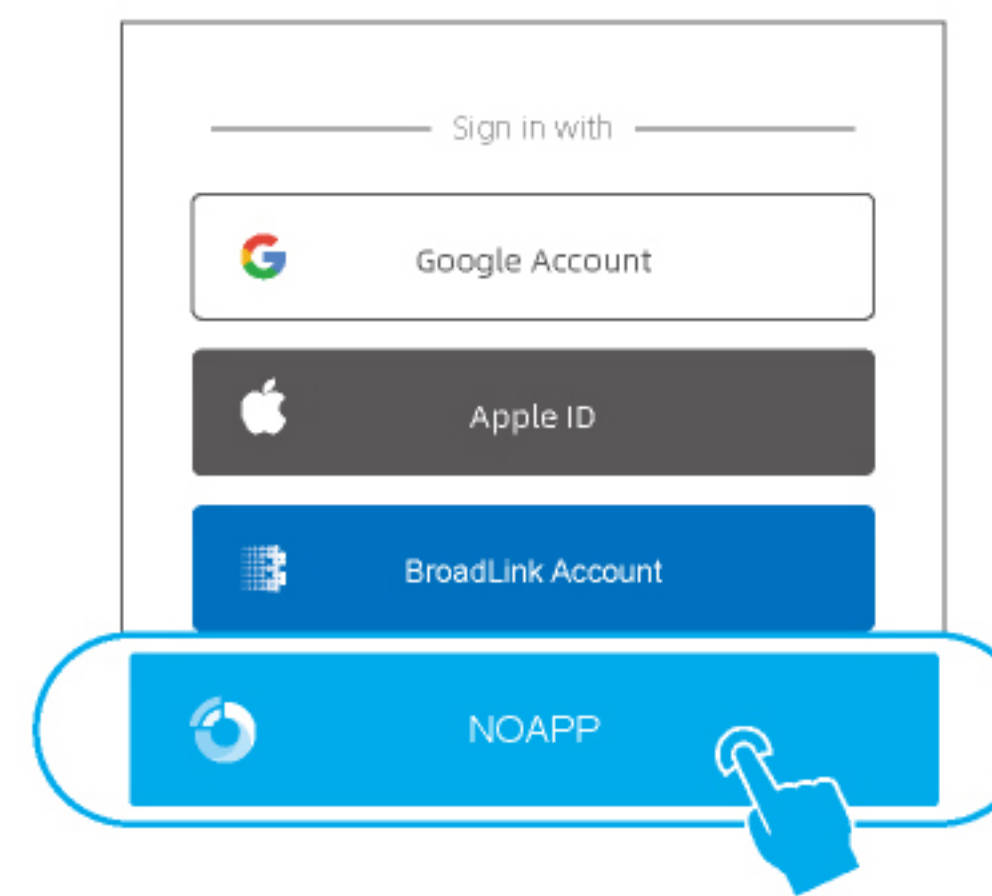

- The LED indicator will be flashing slower and then always on (bulb) or flashing slower and then off (other products).
- The device has been connected to Wi-Fi network.
- You will receive a confirmation email after the device is online.

## STEP 6 Download Alexa, Google home

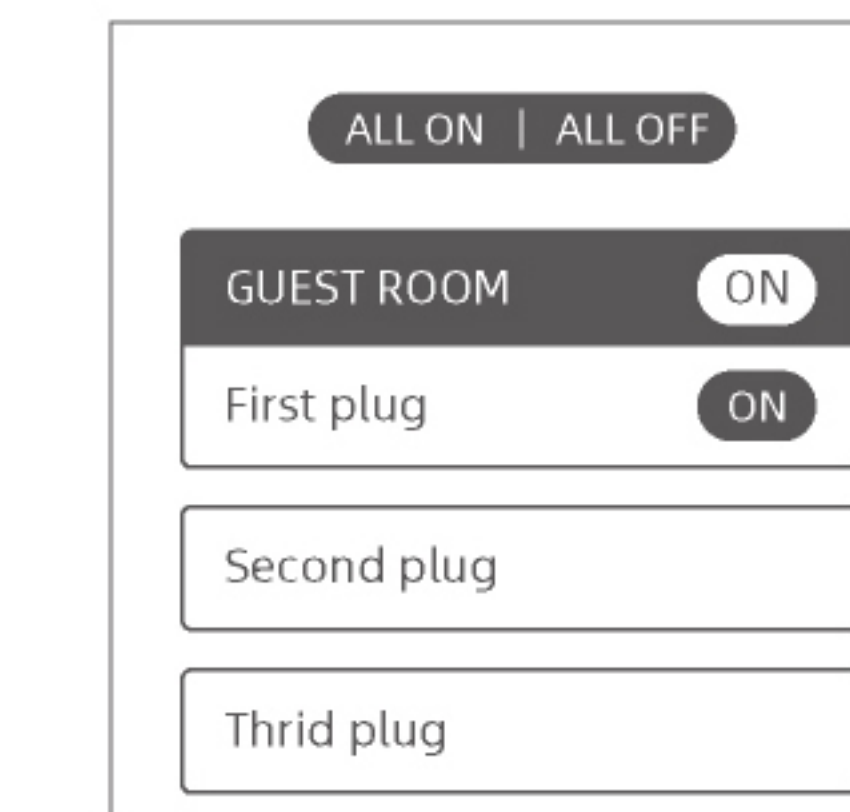

- Download the latest version of Alexa or Google Home APP.
- In Alexa APP, tap "≡", and choose "Skills & Games". Tap "Q" to search and enable "BroadLink".
- In Google Home APP, tap "+" and choose "Set up device". Tap "works with Google", then search and enable "BroadLink".

## STEP 7 Link account

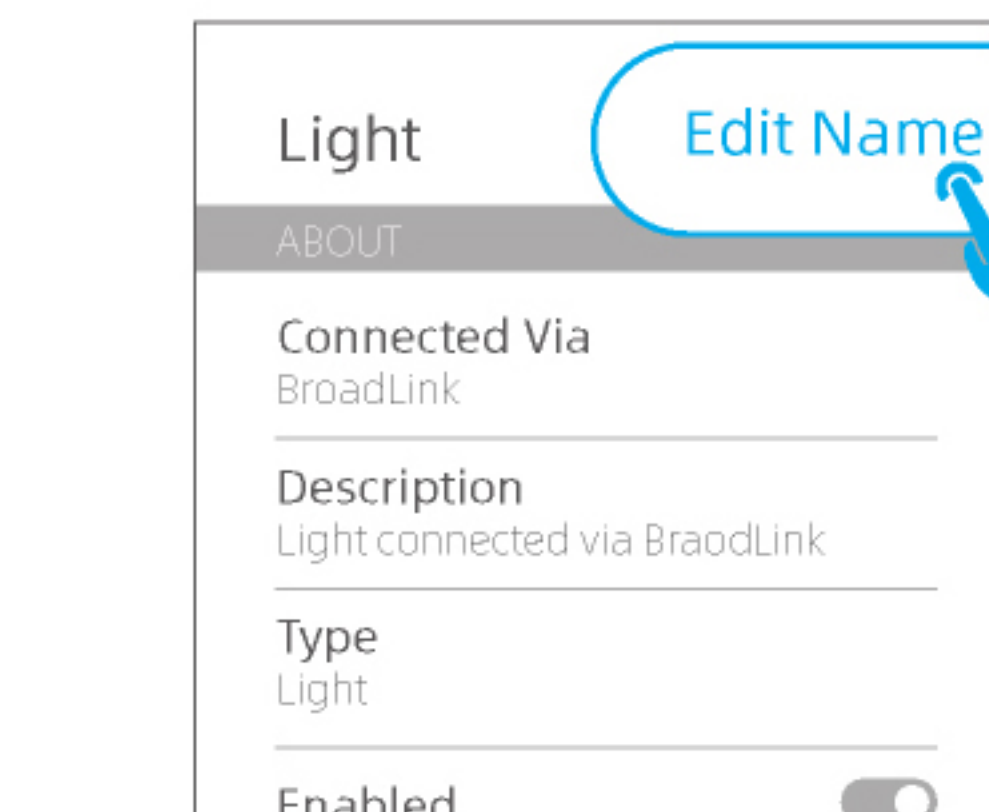

- Choose "NoAPP" and confirm your region to proceed.
- Input the same **email\*** as you used in popup landing page and input verification code received by email.
- Link your **email\*** with Apple ID or Google account for quick sign-in next time (optional).

## STEP 8 Discover devices

- After discovering devices, you will be able to control the devices by APP or voice.
- The devices will be displayed with their default names (ex. "Plug" for smart plug; "Color Bulb" for multicolor bulb).
- If you added more than one same device, the names will be added with "First, Second..."

## STEP 9 Rename devices

- You can tap "⚙️" in device control page and tap "Edit name" to change the device name.
- \* If you are setting up the second device, you will get notification from Alexa after STEP 7 is completed, or you can find the device in Google Home APP after few minutes.

## STEP 10 Try our APP

- You can also use BroadLink APP to try more functions such as max working time (smart plug only), easier timers, groups.
- To download "BroadLink" APP, please go to APP store or Google Play by searching "BroadLink".
- Use the same **email\*** as used in NoAPP to sign up an account and then sign in.
